

NovaTech Solutions — Employee Handbook

Demo document for Retrieval-Augmented Generation (RAG) pipeline testing.

1. Company Overview

NovaTech Solutions is a fictional technology company that builds cloud software for small and medium-sized businesses. The company operates engineering, product, sales, customer success, finance, and people operations teams.

Employees are expected to communicate clearly, protect confidential information, treat colleagues respectfully, and follow company security policies.

2. Working Hours and Attendance

Standard working hours are 10:00 AM to 7:00 PM, Monday through Friday, with a one-hour lunch break. Teams may define different collaboration windows when business requirements demand it.

Employees working remotely must remain reachable during core collaboration hours from 11:00 AM to 5:00 PM. Repeated unexplained absence during collaboration hours may be escalated to the manager.

3. Leave Policy

Employees receive 18 paid leave days per calendar year. Leave should normally be requested at least three working days in advance.

For emergencies or unexpected illness, employees should notify their manager as soon as practical. Unused annual leave does not automatically convert to cash unless required by applicable law or a specific employment agreement.

Parental leave, bereavement leave, and other statutory leave are handled according to applicable law and company policy.

4. Remote and Hybrid Work

Eligible employees may work remotely on approved days. Remote employees are responsible for maintaining a suitable workspace, reliable internet access, and secure handling of company information.

Employees must not use public computers for confidential company work. Company laptops must use device encryption, screen locking, and approved security software.

5. Information Security

Passwords must be unique and must not be shared with another person. Multi-factor authentication is required for corporate email, source-code repositories, and production systems.

Confidential documents must only be stored in approved company systems. Employees should report suspected phishing, credential theft, or accidental data disclosure to the security team immediately.

6. Performance and Development

Managers conduct quarterly performance conversations covering goals, delivery, collaboration, and professional development.

Employees are encouraged to maintain an individual development plan. The company may reimburse approved learning programs, technical certifications, and conferences subject to budget and manager approval.

7. Expense Policy

Business expenses must be reasonable, necessary, and supported by receipts. Expenses above ■10,000 require manager approval before purchase unless there is an emergency.

Travel reimbursement may cover approved transportation, lodging, and meals. Personal entertainment and expenses for family members are not reimbursable.

8. Common Questions

Question: When should I request planned leave? Answer: Normally at least three working days before the leave begins.

Question: Can I work remotely every day? Answer: Only if your role and manager-approved work arrangement permit full remote work.

Question: What should I do after clicking a suspicious link? Answer: Disconnect from the network if appropriate and contact the security team immediately.
